STAS... the art of hanging art!

Since 1995, STAS picture hanging systems, the brainchild of brothers and founders Rien and André Stas, has proven itself to be the world’s most innovative manufacturer of high-quality picture hanging systems. That is why STAS products are used all over the world in both family homes and in businesses, educational institutions, government buildings and the most prestigious museums and galleries. STAS offers an extensive and unusually clever range of patented hanging systems that can be attached to the wall or ceiling and, in some cases, combined with lighting. By choosing STAS’ revolutionary systems, you choose a hanging system that offers almost boundless possibilities.

STAS only uses the best materials and closely controls every step of the production process. Dozens of unique patents have been awarded to our products. The STAS smartspring was even awarded a gold medal at the Inventors’ Convention in Geneva and the STAS cobra has won a ‘Good Industrial Design Award’. The STAS minirail won the ‘Best Product Design Award for Decorative Accessories’.

If you require a high-quality, functional and elegant picture hanging system, STAS offers you everything you need under one single roof.

- user-friendly solutions for all wall and ceiling types
- measuring service and expert advice, on site if required
- quotations for your specific needs within 24 hours
- all components are available directly from stock
- our own professional fitting team
- excellent after-sales service

This catalogue presents numerous solutions that have been specially developed by STAS to help you hang your pictures safely, flexibly and elegantly. More information is also available on our website www.stasgroup.com.

Yours sincerely,
Rien & André Stas
STAS hanging systems for wall mounting
**STAS wall systems**

**STAS minirail**
thinnest and most innovative picture hanging system in the world

**STAS cliprail**
basic hanging system

**STAS cliprail max**
handing system for the perfectionist

**STAS cliprail pro**
picture hanging system with increased capacity

**STAS plaster rail**
almost invisible but very effective

**STAS j-rail**
simple picture hanging system for making quick changes

**STAS j-rail max**
picture hanging system for heavy paintings
“If you want an elegant, barely visible hanging system, STAS minirail is your best choice.”
product description
The patented STAS minirail system is the thinnest and most innovative picture hanging system in the world. The rail, which is available in white or a natural aluminium colour, is only 16 mm wide and perfectly blends in with your interior. Fitting, using the specially developed STAS minirail clipscrew, couldn’t be simpler.

application
If you want an elegant, barely visible hanging system STAS minirail system is your best choice. The minirail is an elegant rail that attaches to the wall.

mount assembly

features
material: aluminium rail
colour: white, aluminium
dimensions: 9 x 16 mm
carrying loads: up to 25 kg per meter

Wall-mountable STAS picture hanging systems with integrated lighting
**STAS** wall systems with lighting

**STAS multirail**
patented hanging system for paintings combined with a 12V lighting rail

**STAS multirail crown**
hanging system with 12V lighting rail, perfect in combination with a decorative frame

**STAS multirail max**
ceiling fitting picture hanging system with an integrated 12V lighting rail
**product description**
The STAS multirail system is a worldwide patented painting suspension system equipped with 12V lighting rail. This revolutionary system gives you a suspension system with an unprecedented number of possibilities. You can hang paintings, postcards and posters in the blink of an eye. Easily moveable light fittings can be clicked anywhere you like onto the rail, for example to spotlight your wall decorations with LED or halogen lamps. But the STAS multirail goes further. Using the STAS powerline, digital panels and 12V LED televisions are also easy to connect to the STAS multirail.

**application**
If you want a safe, multifunctional hanging system with integral 12V lighting, the STAS multirail system is your best choice. The multirail attaches to the wall.

product description
The STAS multirail crown system is a unique and patented painting suspension system for direct screw fastening to the wall and is equipped with a 12V lighting rail. The STAS multirail crown is an exceptionally sturdy and solid profile. The rail can be almost completely hidden using an ornamental frame or a STAS moulding. Easily moveable light fittings can be clicked anywhere you like on to the rail, for example to spotlight your wall decorations with LED or halogen lamps.

application
The STAS multirail crown system is suitable for newly built and existing properties and very appealing in classical buildings. The rail can be perfectly plastered in by integrating the rail into a plaster ornamental frame as desired or one of the STAS mouldings.

“Hanging and lighting in one system!”
The STAS multirail max is a worldwide patented hanging system equipped with a 12V lighting rail. This sturdy system has been designed for perfectionists. The STAS multirail max has an extended face which gives the user the ability to install the system tight to the ceiling. Ceiling, wall and multifunctional hanging system become one. Easily moveable light fittings can be clicked anywhere you like onto the rail, for example to spotlight your wall decorations with LED or halogen lamps. Using the STAS powerline, digital photo frames and 12V LED televisions are also easy to connect to the system.

### application
The STAS multirail max is fastened to the wall and ensures a tight fitting to the ceiling. The cabling can easily be concealed behind the flange. For best results after installing the rail, run over the join between the STAS multirail max and the ceiling with, for example, an (acrylate) sealant.

STAS hanging systems with an integrated lighting rail for mounting to the ceiling
**product description**

The STAS multirail flat is a unique and patented painting suspension system for ceiling fastening, equipped with a 12V lighting rail. The STAS multirail flat is an exceptionally sturdy and solid profile which can be almost invisibly concealed in plasterwork, flat decorative framework or a STAS moulding. Easily movable light fittings can be clicked anywhere you like on to the rail, for example to spotlight your wall decorations with LED or halogen lamps. Using the STAS powerline, digital panels and 12V LED televisions are also easy to connect to the STAS multirail.

**application**

The STAS multirail flat system is suitable for newly built and existing properties. STAS multirail flat is fastened to the ceiling. The STAS multirail flat can be perfectly plastered into a decorative framework. Bonding on to a plaster, wooden or foam decorative frame or wooden ceiling is also possible.

**STAS paperrail**
hanging due to the gravity of the marbles in the rail
product description
Hang your wall decorations safely, elegantly and flexibly using the STAS hanging systems. With STAS picture hooks you can hang your paintings, photo frames and other wall decorations perfectly. The zipper and smartspring are so simple to adjust that you can hang your decorations at the right height in an instant. Thanks to the patented cobra there is no longer any need to slide the perlon cord, steel cable or rod onto the rail; it can simply be hooked on wherever you choose.

application
The perlon cord is almost invisible and in combination with the smartspring it can bear a load of up to 4 kg and with the zipper up to 15 kg per cord. The steel cable, also available in white or black, is suitable for hanging heavier wall decorations; with the zipper it can hang up to 20 kg per cable. The STAS rod supplied with the cobra can be combined with the spring hook to bear a weight of up to 15 kg.

**product description**
The STAS multirail accessories are applicable to the STAS multirail, multirail max, multirail crown, multirail flat and the u-rail multi system.

**product description STAS armatures**
The STAS armatures are available in three different designs. The ‘sirius’ light fitting has lengths of 40 and 50 cm. The ‘signo’ light fitting is curved and has a length of 70 cm. The STAS ‘classic’ lighting fixture is available in chrome as well as in white and in lengths of 50 and 70 cm. You can easily click all STAS light fittings anywhere you like on the rail, to spotlight your wall decorations with STAS LED or halogen lamps.

**product description STAS powerline**
De STAS powerline 12V is a unique and attractive suspension system for the multirail that is equipped with two integrated 12V cables. The combination of the STAS powerline and the powerhook gives you endless possibilities. This is ideal for the suspension of 12V digital panels, the STAS partout, or a 12V LED television.

**product description STAS partout**
This digital media panel is suitable to play photos, movies, music, and presentations. The STAS partout is easy to fit with the powerline and powerhook into the STAS multirail.

**guarantee**
1 year
**Product Description**

Papers, drawings, memos and photos easily stay in the rail due to the gravity of the marbles in the rail. The range of applications is endless, where people use paper, the paperrail can be used. In offices, working environments, in the catering business or at home.

**Application**

With STAS cords and rods, available in several lengths, you can easily hang the STAS paperrail on rail in to all the STAS systems. The STAS paperrail on rail is also available in a model for wall mounting, named STAS paperrail.

**Mount Assembly to Hanging Systems**

Disclaimer This catalogue has been put together with great care. Nevertheless, the catalogue may still contain type-setting and/or printing errors. Obviously, STAS accepts no liability for errors of this nature. In conjunction with its policy of continual product improvement, STAS reserves the right to implement changes to the range, models, colours, prices, etc. as and when circumstances make this necessary. Correct installation of STAS hanging systems is of essential importance. The installer must assess the strength of the walls or ceilings in the locations where the hanging systems are to be fitted, and the expected loads, and take account of and observe all relevant local regulations and legislation. If necessary, the installer must use fasteners that are more suitable for the task. The installer always has final responsibility for correct fitting, assessment of the walls or ceilings and the choice of fasteners. Maximum weights are indicated in the catalogue. STAS refuses all liability for improper use or when the products are subjected to a higher load than that advised. STAS also refuses liability for direct, indirect or consequential damage arising from attachment to structures of insufficient strength, combination with systems other than STAS hanging systems or unauthorised combinations of STAS hanging systems.
